*) Organized in collaboration with IEEE/LEOS Benelux Student Chapter

III. List most significant chapter improvements over last year (*Most Improved Chapter Award*)

IV. List workshops, symposia, educational programs, consulting programs, job fairs etc. (*Most Innovative Chapter Award*)

The Benelux chapter organized a one and half day symposium and a one day workshop in collaboration with the Benelux student chapter. Also, a number of colloquia were held, with renowned speakers, about topics in the LEOS fields of interest.

An additional one-day symposium was organized in collaboration with the Joint European Platform for InP-based Photonic Integration of Components and Circuits (JePPIX): "How Micro-Photonics can work for you". This symposium was a very successful event that attracted over 100 attendees. It was collocated with our annual symposium and the attendees were free to visit the evening program, including a poster session and two invited talks.

V. Number of Members elevated to Senior-Member grade (*New Award*).

VI. Miscellaneous Information/Elaboration on any of the above entries (see below)

Two of our LEOS Benelux members were nominated IEEE fellow: prof. Roel Baets (Ghent University) and prof. Ton Koonen (Eindhoven University). Both are members of the advisory board of the LEOS Benelux chapter.

VII. "Best Practices" and Pre-college Programs

Large part of the vitality of our chapter is due to the active involvement of a large number of students (Ph.D. as well as master). They can easily become a LEOS member when they attend the annual symposium, which is the major local event in the Benelux region in the LEOS related fields.

This year's symposium was a one and half day event with over 150 attendees and 77 scientific contributions, comprising 5 invited papers, 16 contributed papers selected for oral presentation and 56 poster presentations. The symposium proceedings are available in printed form at the event itself, and are also publicly accessible through the chapter website (leosbenelux.org). Most of the contributions were presented by students. The edition of proceedings of all contributions gives an additional stimulus, as academic contributors are interested in opportunities for scientific output. The poster session was linked to a Student Poster Contest, which has rewarded the best poster presented by a student as a first author.

The Benelux chapter has a separate student chapter, started in 2004, that organizes student-specific activities, such as company visits. In addition, the student chapter is co-organizing our annual symposium, as well as the annual workshop that focuses on a specific topic. This year's workshop about "Progress in Optical Devices and Materials" was held in Eindhoven and had two invited speakers and 10 contributed papers.

Two of our LEOS Benelux members were nominated IEEE fellow: prof. Roel Baets (Ghent University) and prof. Ton Koonen (Eindhoven University).

The board of the Benelux Chapter consists of a good mix of engineers and scientists from industry as well as academic institutions including two active student members. Over the 9 years of existence of the Chapter there is a continuous refreshing of board members sufficient slow to conserve experience and knowledge, but sufficiently rapid to avoid too much routine and to stimulate renewal.

We wish to have our chapter considered for the following chapter awards:

- Chapter of the Year (All information)
- Best Membership Percentage Increase (Part I.C.)
- Most Improved Chapter (Part III)
- Most Innovative Chapter Activities (Part IV)
- Most Senior Member Elevations (Part V)

Chapter Chair Signature:

A handwritten signature in black ink, appearing to read 'W. J. J. J.', written over a horizontal line.

VI. Miscellaneous Information/Elaboration on any of the above entries

We organized our 11th annual symposium as a one day and half event with an evening session and a complete day session. The symposium has been managed such that two invited talks were presented on November 30, 2006 evening:

Gerlas van den Hoven, Genexis, The Netherlands "The Dynamic Bandwidth of Fiber-to-the-Home"

Ton Koonen, TU/e, The Netherlands , "Broadband Communication research activities at the COBRA Institute"

This was followed by the odd-numbered poster presentations (36). The next day session was balanced with oral (16) and even-numbered posters presentations (35) and two invited talks:

David Plant (McGill University, Canada) "Agile All-Photonics Networks - A Vision of Optical Networks for 2012 and Beyond"

Masaya Notomi (NTT Basic Research)"All Optical Control of Light by Photonic Crystal Nanocavities"

As usual, the emphasis has been put on exchange between students, professionals, professors, which is best facilitated through the poster sessions that are combined with lunch and drinks. The large number of papers presented and their high quality demonstrate the vitality of the Benelux chapter. The printed version of the proceedings are distributed among the participants, the electronic version is freely accessible on the Benelux Chapter website (leosbenelux.org).
