

Solid State Lighting - The Road Ahead

Hans Nikol

Philips Lighting
Mathildelaan 1
5611 BD Eindhoven, The Netherlands.

Solid State Lighting has entered the stage of general illumination. The promise of the technology will have a dramatic impact on existing lighting applications as well as enable many new applications. Furthermore, substantial energy savings will be realized, accelerating our Greenswitch initiative. The presentation will describe the status of technology and the consequence for applications, recent and future trends, impact on society and the global challenge of energy supply and environment.
